After

Treatments: 7 x Body Contouring treatments in 5 weeks

Testimonial: I've always felt so self-conscious with my tummy area after fluctuating in my weight my whole life suffering severe hormonal issues. In and out of surgery. And was never able to shift this belly weight, I went to Thailand 2 years ago and got Liposuction. Wow what a bad move that was. It just become worse from there, losing so much elasticity from my stomach, I tried various non-surgical treatments to try and fix this disaster lipo sculpting job, So at first I was a little sceptical when the girls from Oi told me they could help.. as you could imagine, after having no success with any other treatment available in the market today, but I was desperate and looking at getting a tummy tuck. I am so happy I chose the contour plus. I'm feeling so much more confident and am just amazed with the way the treatment has worked. I still have 3 treatments to go and always look forward to coming in for my contouring treatment.
