

# COSMETIC INJECTION AREAS

Some signs of static lines and wrinkles can be eliminated by using Anti-Wrinkle injections and Dermal Fillers. For the best results or as an alternative treatments, skin can be treated further and improved by use of Hydrating Textural Injections, Platelet Rich Plasma (PRP), Skin Dermal Needling, chemical peel, IPL and Microdermabrasion.

## DERMAL FILLERS

### WHAT ARE DERMAL FILLERS?

A dermal filler is a smooth injectable gel placed below the skin's surface to 'plump up' static facial lines and folds, creating a natural and refreshed facial expression.

### HOW DO THEY WORK?

The dermal Fillers we use are "Hyaluronic Acid" fillers made up of a complex sugar chain which is chemically identical to what is found in human skin. Injected into the skin, fillers create volume and also stimulate collagen production.

### WHAT CAN DERMAL FILLERS BE USED FOR?

As we age, our skin loses elasticity and plumpness. When we move our muscles to create facial expression, the skin no longer 'springs back' and lines and wrinkles start to appear. Dermal fillers can help you to restore a youthful, natural-looking appearance, subtly reshape flat or sunken cheeks, redefine a jawline and chin or add fullness to your lips. We can tailor a solution to your beauty needs.

- Soften deep forehead or frown lines for a smooth forehead
- Reduce dark circles under the eyes
- Plump the cheeks for beautiful facial contours
- Reduce nasolabial folds for a more rejuvenated appearance
- Soften vertical lip lines or 'smoker's lines'
- Plump the lips for the perfect pout
- Correct a 'mouth frown' for a less stressed appearance
- Plump and firm marionette lines or jowls for a more toned lower face
- Enhance the chin for clients wanting more definition

### DERMAL FILLERS PRICE LIST

Thin dermal filler (1 ml)	\$490.00
Medium dermal filler (1 ml)	\$540.00
Thick dermal filler (1ml)	\$590.00
Contouring filler (1 ml)	\$640.00

Thick dermal filler (1 ml)	\$590.00

### TREATMENT OF DARK CIRCLES UNDER-EYE / TEAR TROUGH

Tear trough treatment	
Dermal filler (1 ml)	\$480.00

**\*Prices may change without notice. Subject to terms and conditions.**

## ANTI-WRINKLE TREATMENTS/ MUSCLE RELAXANT

Wrinkles are folds or creases on the skin that can make you appear older. As we age, the supportive components of our skin (elastin, collagen etc.) degenerate over time. We get more and more wrinkles and our skin slowly become thinner, drier and less elastic, causing it to lose its lustre and becomes sagged and lined. Anti-Wrinkle Injections can provide you with a fresher look by reducing lines and wrinkles created by facial expressions. We offer a complete range of muscle relaxant products and our experienced practitioner can advise you on the best way you can use these products to reduce wrinkles in both the upper and lower face.

### THE FOLLOWING AREAS CAN BE IMPROVED WITH ANTI-WRINKLE INJECTIONS TREATMENTS:

- Soften crow's feet, frown lines & forehead lines
- Give a subtle brow lift to open the eye area
- Soften bunny lines (the lines that appear when you scrunch up your nose)
- Soften vertical lip lines
- Reduce chin dimpling
- Lift corners of the mouth
- Firm the skin around the neck & reduce neck bands
- Reduce a 'gummy smile' (when the gums show when you smile)
- Slim a strong or square jawline

**TYPE D - \$3.50/Unit**  
Equivalent to \$9.30 / Standard unit

**TYPE B - \$11.50/Unit**  
Equivalent to \$11.50 / Standard unit

**TYPE X - \$11.50/Unit**  
Equivalent to \$11.50 / Standard unit

Note that each Standard unit injected contains 1 x B unit OR 1 x X unit OR 2.5 x D units. Unfortunately, due to government restrictions on advertising, we cannot mention the specific names of these products.

### AVERAGE DOSES REQUIRED

Forehead: 20-50 units  
Frown lines: 40-70 units  
Crow's feet: 40-70 units

**FOR PRODUCT B & X:**  
Forehead: 8-16 units  
Frown lines: 16-24 units  
Crow's feet: 16-24 units

## TERMS AND CONDITIONS FOR COSMETIC INJECTION

- Cosmetic injection treatments cannot be pre-paid.
- Cosmetic injection clients must be deemed medically, fit and suitable for treatment after following a consultation with our injector.
- For legal reasons, the product names cannot be used in advertising. Please contact our clinic for details.
- Consultation must be booked in advance.
- Recommended only for person 18 years and over who fully understand the treatment and the risks of the treatment.
- Any surgical or invasive procedure carries risks. Before proceeding, it is recommended that a second opinion from an appropriately qualified health practitioner is obtained.

### POSSIBLE ADVERSE EFFECTS OF COSMETIC INJECTABLE TREATMENTS

Unfortunately, everything we put on, in or expose our body to has a potential side effect.

Redness and bruising can occur after your anti-wrinkle injection procedure, which can be covered with makeup and will resolve in a day or two. In rare cases, other complications may arise but we make every effort to minimise all risk and produce a successful and natural result for each of our clients.

Side effects from the Dermal Fillers treatment are extremely rare. It is unlikely to be allergic to the Hyaluronic Acid as an active ingredient of Dermal Fillers but it is rarely possible to have an allergic reaction to the additives used to stabilise those fillers, which can lead to prolonged local swelling and redness. It is possible to get bruising from the injection that will clear within 1-10 days with no long term effects. Most people look 'puffy' in the treated area immediately after due to the water loving properties of the product and body's inflammatory response. This lasts for about 48 hours. It is usually mild and only noticeable to you or friends who know you.

In rare cases, other complications may arise but we make every effort to minimise the risk and produce a successful and natural result for each of our clients.
